

“Vaccines and Vaccinations: Protocols, Products and Controversies”

1. Review prominent issues, controversies, and challenges surrounding canine and feline vaccination.
2. Learn about changes in initial vaccination series recommendations, and explore core and non-core booster interval recommendations for adult animals.
3. Understand “must know” facts that bridge the gap between vaccination recommendations and practice, including indications for antibody testing and interpretation of results, determinations for when to treat non-core vaccines as core, and advice on avoiding vaccine adverse reactions.
4. Learn how to best implement a rational vaccination protocol that provides maximum levels of protection for your practice’s patients.

2hrs of Continuing Education

Presented by

Richard Ford, DVM, DACVIM, DACVPM(Hon)

Following graduation from The Ohio State University, Dr. Ford practiced small animal and equine medicine for 3 years. Subsequently, he completed an internal medicine residency at Michigan State University, then joined the faculty at Purdue University’s College of Veterinary Medicine before becoming the Professor of Medicine at the College of Veterinary Medicine at North Carolina State University.

Dr. Ford is a co-author on both the American Animal Hospital Association Canine Vaccine Guidelines and the American Academy of Feline Practitioners Feline Vaccine Guidelines. For the past 12 years, he has provided continuing education seminars to veterinarians on infectious diseases and immunization. He has published over 200 papers and textbook chapters pertaining to infectious disease in companion animals.
